105.5 FM WDHA THE ROCK OF NORTH JERSEY

AM 1250 WMTR NORTH JERSEY

TOTAL COMMUNICATIONS SERVICE OF DREXEL HILL ASSOCIATES LTD.

December 5, 1986

Mr. William A. Burrows
709 Division Street
Gloucester City, N.J. 08030

Dear Bill,

This letter is to confirm your reception of WMTR, 1250 KC, Morristown, N.J., on August 21, 1986 from 0948 to 1012.

Our studios and transmitters are located in Cedar Knolls, a small town next to Morristown, our city of licence. We are operating a DA-2, 5KW Day, 1KW Nite, and still use our PSA of 500 watts Day Pattern from 6:00 until day time hours. Our transmitter is a Harris MW5 for the main, and a Collins 21-E as an auxiliary. We are transmitting in stereo using the Motorola C-Quam system.

Thank you for your letter. I always enjoy getting DXer letters, although I must apologize for the delay in writing back. I was cleaning up my desk, which is always a mess, and found your letter unanswered.

As to your questions; We are not affiliated with a network. Our serving area is North Jersey. The most interesting report that I have gotten was from Presque Isle, Maine. There are four stations in New England that operate at 1250 Khz. The farthest has been reports from Europe, though this was long before I started working here so I have no details. We have a sister station in Dover, N.J., WDHA-FM. Our format is Adult Contemporary.

Sincerely,

Christopher Cesareo
Chief Engineer
